

Would you trust inferior equipment for your responders? *Then why use inferior electrical systems?*

The Titan™ 105 Gear Reduced Starter Motor

- Only 29 pounds
- Packs 5kW output for demanding medium duty applications
- Equipped with electrical soft start to eliminate gear milling
- Integral mag switch relay assures more reliable starting circuit.

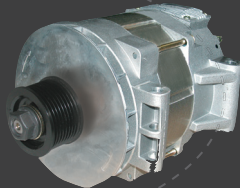

Leece-Neville's quality is legendary.

Leece-Neville
HEAVY DUTY SYSTEMS

The 4000 Series High Amp Alternators

- Up to 320 Amps
- Provides proven high output where demands vary over a wide range of operating RPM's
- Designed to live in 110°C/230°F ambient air temperatures.
- Multi-Power Multiple Alternator Systems can be combined to produce up to 1,080 Amps

Serving the Carolinas since 1967
